

2016 Spring Retreat

Twinkling Electronic Jewelry

Instructor: Robin Lawson
Website: LumenElectronicJewelry.com
When: Saturday, March 19, 1:30pm to 4:30pm
Skill Level: Open to All
Cost of Class: \$50, includes kit

Learn to solder your own twinkling LED jewelry pendant, powered by the sun. No batteries required, it charges itself and blinks for several hours after dark. Students will make the Owl in class. All materials provided, all you need is a steady hand and a willingness to learn. Most students will finish the first kit in two hours and are welcome to purchase and assemble a second. Four kits available at discounted price for LBS members: Owl, Fox, Skull, and Heart.

Kit Contains:

- materials to make the piece
- consumables and use of tools during class

Supplies and/or Tools to bring to class:

- task light and extension cord, optional
- magnifiers, optional

The soldering iron heating element reaches about 450 F and may burn the skin if used improperly. No open flames. Those with asthma or other breathing conditions should be aware that soldering releases a small amount of smoke that may irritate the lungs and eyes. It is similar to wood smoke and not harmful.
